Summary

Self-taught software engineer with +5 years of professional experience, trained through rigorous programs including Udacity, Helsinki University, Holberton School, and ALX Africa. Passionate about solving complex problems and crafting efficient, elegant software solutions. A lifelong learner thriving in dynamic environments and contributing to high-impact engineering projects. Skilled in full-stack development with a focus on frontend technologies, specializing in React, Next.js, TypeScript, Node.js, and modern web development practices. Experienced in building scalable web applications, optimizing performance, and collaborating in cross-functional teams across fintech, construction, and insurance sectors. I thrive on solving complex problems and delivering high-quality solutions that exceed expectations. My approach combines technical expertise with user-centered design thinking. When I'm not coding, you'll find me exploring new technologies, contributing to open source projects, or mentoring fellow developers in the community.

Experience

Senior Frontend Developer — Equivator

Riyadh, Saudi Arabia - Remote | 09/2025 – 12/2025

- Led development of two full-scale web apps (Admin + Partner) for a construction management platform.
- Architected and maintained a scalable monorepo (Turborepo + PNPM) with shared UI packages and internal tooling.
- Implemented material/equipment inquiries, quotation workflows, project management, and supplier onboarding modules.
- Built a robust, cross-app notifications system supporting real-time and event-driven business flows.
- Collaborated with distributed teams (UI/UX, backend, QA) across Egypt, Syria, Turkey, and UAE to deliver production-ready features.
- Delivered type-safe API integrations using automated OpenAPI client generation.
- Optimized performance, improved build pipelines, and ensured consistent deployments for dev, staging, and demo environments.
- Contributed to design system development, enhancing UX consistency across both applications.

Full Stack Software Engineer — Salem Ventures & TradeSocio

Zahraa Al Maadi, Cairo, Egypt - On-Site | 07/2024 – 07/2025

- Developed Bruno, a trading platform used by 10K+ users, using React, Tailwind CSS, and Redux.
- Increased platform performance by 60% through modularization and advanced hooks.
- Integrated biometric authentication (Face ID/Fingerprint) across iOS & Android builds.
- Delivered ERP system managing 500+ client accounts and permissions with React Query and REST APIs.
- Reduced frontend defects by 40% after refactoring legacy code into reusable components.
- Coordinated with cross-functional teams to launch 20+ features across 3 fintech products.
- Provided mentorship to junior developers and onboarding support to new hires.
- Partnered directly with CEO on strategic feature roadmap and market fit goals.

Software Engineer — Mohandes Life Insurance

Dokki, Giza, Egypt - On-Site | 03/2024 – 06/2024

- Built insurance issuance system increasing processing efficiency by 80%.
- Customized 10+ products to meet specific client requirements.
- Achieved 99.9% uptime by maintaining and improving SISos 11 internal system.
- Produced actionable reports adopted by executive leadership for strategic planning.
- Led modernization of legacy stack, cutting support tickets by 45%.

Software Engineer — ALX Africa

Nairobi, Kenya - Remote | 02/2023 – 06/2024

- Completed 50+ projects, including full-stack web apps using React, Node.js, and PostgreSQL.
- Mastered 12+ tools across front and backend: TypeScript, GraphQL, AWS, CI/CD, and testing frameworks.
- Reviewed peer submissions and supported community learning groups weekly.
- Contributed to production-grade apps featured in ALX engineering showcase.

Software Engineer — Gig Bud

Zagazig, Egypt - Remote | 02/2022 – 02/2023

- Built scalable SaaS web app using Next.js and Express.
- Decreased feature delivery time by 30% through improved time management.
- Owned end-to-end implementation of core modules and database connections.
- Participated in Agile sprints and contributed to daily standups and code reviews.

Education

Software Engineering Program — Holberton School & ALX Africa

Cairo, Egypt - Remote | 02/2023 – 06/2024

Graduated with Front End Specialization from a highly selective and intensive 12-month program.

Advanced Full-Stack Web Development Nanodegree — Udacity

Cairo, Egypt - Remote | 01/2023 – 02/2023

MCIT-sponsored program focusing on advanced topics for job readiness and tech industry immersion.

Full Stack Open MOOC — University of Helsinki

Helsinki, Finland - Remote | 09/2020 – 01/2021

Completed MOOC with distinction; developed several apps and contributed to peer learning community.

Bachelor of Law — Faculty of Law - Zagazig University

Zagazig, Egypt – On-Site | 09/2018 – 06/2022

Completed a 4-year law degree.

Projects

DevInsight — GitHub Analytics Platform

[Live](#) | [Code](#)

- Built comprehensive GitHub analytics platform with React 19, TypeScript, and Tailwind CSS v4.
- Implemented advanced visualizations including contribution heatmaps and developer personas.
- Created customizable dev card generator with 15+ themes and GitHub battles feature.
- Integrated GitHub API with higher rate limits and detailed contribution analysis.

Mirage Master — AI Image SaaS Platform

[Live](#) | [Code](#)

- Developed full-stack AI image processing SaaS with Next.js 14, TypeScript, and MongoDB.
- Implemented 5 AI features: restoration, recoloring, object removal, generative filling, background removal.
- Integrated Stripe payments, Clerk authentication, and Cloudinary cloud storage.
- Built credits system and community showcase with responsive UI/UX design.

Personal Portfolio Website

[Live](#) | [Code](#)

- Created modern portfolio using React 19, TypeScript, and Tailwind CSS v4.
- Implemented comprehensive theming system with dark mode and semantic color variables.
- Added smooth animations, scroll effects, and responsive design principles.
- Showcases professional experience, technical skills, and project portfolio effectively.

React & Next.js Production Templates

[React 19](#) | [Next.js 16 Full-Stack](#) | [Next.js 16 Backend](#) | [Express TypeScript](#)

- Built 4 production-ready templates: React 19, Next.js 16 full-stack/backend, and Express.js with TypeScript.
- Implemented auto-generated OpenAPI documentation with type-safe API clients and zero-configuration discovery.
- Created comprehensive developer tooling: ESLint, Prettier, Husky, decorator-based Swagger, and form validation with Zod.
- Features semantic theming systems, dark mode support, React Query integration, and MongoDB integration.
- Templates adopted by developers for modern project foundations with optimized production deployments.

Skills

Languages: HTML, CSS, JavaScript, TypeScript, SQL, Bash, C, Python

Frameworks & Libraries: React 19, Next.js, Vite, Redux, Context API, Express.js, Mongoose, TanStack Router

UI Libraries: Material-UI, Tailwind CSS v4, Bootstrap, Shadcn/UI, Styled Components

State Management & Data Fetching: TanStack Query, React Query, Redux, Context API, Apollo Client

Mobile / Cross-Platform: Capacitor (iOS/Android, biometric auth)

API & Auth: REST APIs, OpenAPI, Swagger, GraphQL, JWT Authentication, Clerk, bcrypt, dotenv, cors, Webhooks, Axios, Fetch API

Databases: MongoDB, PostgreSQL

Testing: Jest, Jasmine, Cypress, Playwright

CI/CD & DevOps: Git, GitHub, GitHub Actions, CI/CD Workflows, CircleCI, Netlify, Heroku, Vercel, AWS, Husky, ESLint, Prettier

Other Services & Tools: Stripe, Cloudinary, Scroll-Lock

Languages

Arabic — Native

English — C1
