Summary

I'm a self-built software engineer, sculpted by the rigorous programs of Udacity, Helsinki University, Holberton School and ALX Africa's Software Engineering Program. Embracing the dynamic world of coding, I find my passion in unraveling complex challenges and crafting elegant solutions. With this endeavor, I embrace the thrill of exploration and the satisfaction of creation.

Education

Software Engineering Program

02/2023 – 06/2024 | Cairo, Egypt - Remote

Holberton School & ALX Africa 🔗

Holberton School and ALX Africa are the reason we have a great scholarship like 12-Month Software Engineering Program, It's one of the best scholarships in the tech industry and also one of the hardest, What a journey and I'm glad that being part of it, this is the place where I honed my skills and went to the next level of excellence, not everyone started this scholarship managed to graduate which makes everybody else the elite who managed to cross the finish line, and I'm finally graduated with Front End Specialization.

Advanced Full-Stack Web Development Nanodegree

01/2023 – 02/2023 | Cairo, Egypt - Remote

Udacity 🔗

As I'm leveling up in my studying I pushed myself further to gain more experience and knowledge with advanced topics, Thanks to MCIT (Ministry of Communications and Information Technology) and Udacity I was able to level up my skills and be ready to land a job in the tech industry.

Full Stack Open MOOC

09/2020 – 01/2021 | Helsinki, Finland - Remote

Computer Science Department - University of Helsinki 🔗

Full Stack Open MOOC 2020 at University of Helsinki is the best place to study, the MOOC community was the most beautiful and supportive studying environment I have ever been, with the help of the creator of this MOOC and my mentor professor Matti Luukkainen I managed to crack my way in the tech industry and software development realm, I can proudly say that this is my real step for me to consider myself a real software engineer, after I finished it I felt the power in my hands to build whatever idea came to my mind and I had a lot of fun there.

Bachelor of Law

09/2018 – 06/2022 | Zagazig, Egypt - On-Site

Faculty of Law - Zagazig University 🔗

I studied Law for 4 years at Faculty of Law - Zagazig University.

Experience

Software Engineer

03/2024 – 06/2024 | Dokki, Giza, Egypt - On-Site

Mohandes Life Insurance 🔗

At Mohandes Life Insurance, I play a crucial role in developing and maintaining innovative software solutions to streamline our insurance processes and enhance customer experiences.

Key Achievements:

- Enhanced Efficiency: Developed and implemented an issuance system, boosting efficiency by 80%.
- Product Customization: Configured and customized company products to precisely meet client specifications, ensuring high customer satisfaction.
- System Reliability: Maintained and upgraded the internal SISos 11 system, achieving an impressive 99.9% uptime.
- Data-Driven Insights: Generated comprehensive reports, providing critical insights that significantly improved decision-making processes.
- Modernization Initiatives: Spearheaded the migration of legacy systems to modern web technologies, significantly improving system performance and user satisfaction.

Software Engineer

02/2023 – 06/2024 | Nairobi, Kenya - Remote

ALX Africa 

This company honed my skills and put it in a good use, I built various projects you can check my github, I learned so many skills you can check them below.

Things I learned:

- Proficiency in programming languages such as HTML, CSS, JavaScript, TypeScript, SQL, Bash, C, and Python.
- Understanding of popular frameworks and libraries like React, Next.js, Material-UI, Bootstrap, Node.js, Express, MongoDB, and PostgreSQL.
- Knowledge of working with various cloud platforms and services including AWS, Vercel, Heroku, and Netlify.
- Experience in building and consuming RESTful APIs as well as familiarity with GraphQL.
- Competence in version control using tools like Git and platforms like GitHub.
- Ability to write unit tests and conduct testing using frameworks like Jest, Jasmine, and Cypress.
- Understanding of software development methodologies and best practices.
- Skills in deploying and managing applications using continuous integration and continuous deployment (CI/CD) tools like CircleCI and GitHub Actions.
- Proficiency in writing clean, maintainable code and following coding standards.
- Knowledge of database management, including designing schemas, querying, and optimization.
- Experience in full-stack development, from frontend user interfaces to backend server logic.
- Familiarity with agile development practices and collaborative tools for team-based projects.

Activities and societies:

- Participated in PLD (Peer Learning Day).
- Reviewed my peers projects.
- Helped my peers in our community groups.
- Solved software engineering problems.
- Built a portfolio projects.

Software Engineer

02/2022 – 02/2023 | Zagazig, Egypt - Remote

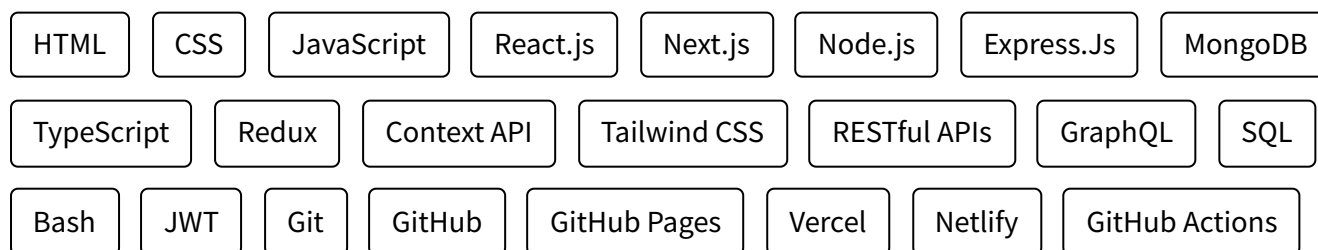

Gig Bud 

I finished the One-Year Software Engineering Internship at Gig Bud, it was an amazing working experience, I learned a lot and pushed my productivity to it's limits, it was a great time for me.

Things I worked on:

- Used Next.js to build the SaaS.
- Implemented the API and connected it to the database.
- Worked in a team.
- Took care of the details.
- Managed my time wisely.

Skills

Projects

Brainwave 

03/2024

Brainwave Is A Modern Website With Sleek Parallax Effects And Bento Box Layouts, It Covers Everything From Stylish UI Design To Mobile-First Principles.

Tools used: React.Js | Vite.Js | Tailwind CSS | React-Router-Dom | Scroll-Lock | Vercel

Source code here  .

Mirage Master

02/2024

Mirage Master Is An AI Image SaaS Platform That Excels In Image Processing Capabilities, Integrates A Secure Payment Infrastructure, Offers Advanced Image Search Functionalities, And Supports Multiple AI Features, Including Image Restoration, Recoloring, Object Removal, Generative Filling, And Background Removal.

Tools used: Next.js | Node.js | TypeScript | MongoDB | Mongoose | Tailwind CSS | Shadcn-UI | Clerk | Cloudinary | Stripe | Webhooks | Vercel

Source code here

Tvflix

01/2024

Tvflix Is A Web Applications To Show The Latest Movies.

Tools used: HTML | CSS | JavaScript | Github Pages

Source code here

Portfolio

09/2023 – 10/2023

This is my portfolio application where I wrote a little bit about myself and shown my skills and projects, also you can find contact form where you can send your message to hire me or just say hello and I recieve it on the other end.

Tools used: React.js | Next.js | Node.js | CSS | Github Pages | Github Actions
